

KNIGHTSBRIDGE
DISTINCTIVE BRITISH FURNITURE

Designing and developing furniture for the Healthcare sector has been at the **heart of Knightsbridge's business** since the inception of the NHS in the **1950's**.

Manufactured on site in West Yorkshire, England, the portfolio has been **created alongside Healthcare professionals** to understand the important factors which affect both healthcare staff and patients including **infection control, tissue viability, and manual handling**.

“Our range of Patient Seating has been designed to provide a **modern, supportive** seating option for ward and healthcare environments”

UltraClean

“Our **UltraClean** range is ergonomically designed for comfort and **cleanliness**.

With nowhere for dirt to get trapped or for bacteria to grow, the UltraClean provides the ideal **infection control solution**.

Perfect for healthcare.”

Welded **seamless technology** for infection management

Patient Seating

“Our large range of Healthcare recliners cover a wide range of patient needs including **bariatric models, patient transfer chairs, tilt in space recliners, and Trendelenberg recliners.**”

Correct **posture** is one of the most important factors in preventing the development of pressure ulcers.

Sitting correctly ensures that **weight is evenly distributed** and shearing forces are reduced.

To further aid pressure care we offer optional seat cushions:

Profiled Reflexion Pressure Cushion:

Distribution cushion reflexion foam moulds itself to the contours of the user, this helps to spread the body weight more evenly across a greater surface area.

Gel Profile Reflexion Pressure Distribution Cushion:

The gel profile cushion adjusts to the users body movement and helps to spread the body weight more evenly whilst protecting high pressure areas.

To aid **safer working environments**, models from the Healthcare portfolio have been developed with additional features to **aid manual handling** including:

- Optional housekeeping or combination wheels for patient seating
- Heavy duty lockable castors on healthcare recliners
- Optional drop arm features on Dalton and Hamilton High Back Armchairs
- Lightweight frame design

The Knightsbridge Healthcare portfolio is designed with **infection control** and **ease of cleaning** in mind, our models feature several benefits including:

- Hygiene gaps to prevent trapping of dirt, bacteria and fluid
- Anti-Microbial lacquer which is clinically proven to kill 99% of bacteria over a 24 hour period
- Waterproof underbottom as standard
- Removable seat cushions for ease of cleaning
- Wide range of anti-microbial, anti-fungal, easy clean vinyls

Completed Healthcare Projects

Creating Solutions for Procurement Teams and End Users

Staff and parents at a Children's Hospital in England were looking for a **space saving solution** to parents being able to sleep in patient rooms with their children.

The footprint of traditional beds and sofa beds were **too large** to use in the room so Knightsbridge worked to produce a **heavy duty**, contract standard, single sofa bed.

With the **design** of the footprint kept to a minimum, the arms and back on the Domino can be flipped round to create a **comfortable** sleeping area or kept upright to use as a **stylish settee**.
